

**Hunters Point Naval Shipyard Superfund Site
Update on Discussions with Navy | Radiological Remediation Goals for Buildings
Internal EPA Team Meeting, February 25, 2021**

Schedule for the next two weeks

- Monday (3/1), afternoon team meeting
- Friday (3/3), 11 am pre briefing with Enrique
- Monday (3/8), 11 am meeting with DTSC and CDPH
 - Angeles left two voicemails for Grant but hasn't heard back. She asked Enrique to reach out, too.
 - Nina has reached out to Julie Pettijohn; and John has talked with Julie, too.
- Unscheduled, meeting the Laura Duchnak with the Navy (John calling it a "DRC meeting")
 - Last email exchange with the Navy is Enrique's 2/18 email
 - We need to email the Navy about scheduling this meeting

**Summary of recent Navy submittals on background values and status on RESRAD
Builds vs BPRG calculator conversation**

- Laura's latest emails on January 22 and January 27 sent or referred to background data
- Both emails referred to coordinating with the FFA signatories on an early February meeting
- Laura's last email suggested do not seem to be moving in a forward path and the timing to come to solution is getting narrower
- Lawrence sent an email suggesting EPA is not moving fast enough and asked about the timing of the DRC meeting. In addition, he mentioned the pause in the soil work has provided an opportunity to do the inside buildings work. However, Enrique's email came afterwards. This week, Thomas M was asking how hard EPA is working to schedule this pre-meeting with the state.
